Commercial Fisheries

The EIA will use multiple data sources to inform the commercial fisheries assessment, including but not limited to information from:

- Marine Management Organisation
- UK Vessel Monitoring System
- EU annual fisheries landings statistics
- Marine Scotland fisheries datasets
- The Scottish Government's Sectoral Marine Plan

SCAN ME for more info

Throughout the EIA process, consultation with representatives of fishermen's associations and organisations will be undertaken to corroborate the findings of this data, and to provide insight into specific fishing grounds and activity of any vessels active in the area.

Muir Mhòr has been engaging with local, national and regional fisheries associations and stakeholders regarding the project and survey operations in 2023.

The project and their appointed Company Fisheries Liaison Officer (CFLO), Brown & May Marine, are keen to ensure early engagement with both mobile and static sectors to understand concerns and where possible maximise coexistence.

Contact & Feedback

Starting from 15th November 2023 until 17th May 2024, you can visit our virtual public exhibition at **muirMhòr.co.uk**

For further information and details on drop-in sessions, pick up a copy of our Public Consultation available here today.

Your thoughts and feedback are essential for us to make this project a success.

TO SUBMIT FEEDBACK:
Please send your comments via our feedback form by scanning this QR code:

Please feel free to email our team directly with your comments at at the following address: **feedback@muirMhòr.co.uk**

For general enquiries pleasecontact:
info@muirMhòr.co.uk

We kindly request you submit feedback on this event by **17th December 2023.**

There will be further opportunities to comment on the proposals at a 2nd event in the spring of 2024.

How your feedback will be used

Please note that comments provided today are not formal representations to the determining authorities. Following submission of the applications and licences in 2024, there will be periods during which formal representations can be made to Scottish Ministers, Marine Scotland and Aberdeenshire on the offshore and onshore elements of the project.

A second Public Consultation Event will be held in early Spring 2024, at which we will feed back on points raised during this event.
